

Presentation for

The background of the slide is a photograph of a parking lot at night or dusk. Several orange traffic cones are arranged in a pattern, possibly forming a logo or a specific arrangement. The scene is dimly lit, with some light reflecting off the cones and the ground.

Unprecedented Parking Innovation

*Now MotoMesh Ready™
and
MotoWi4 Ready™*

Wireless Parking Solution-

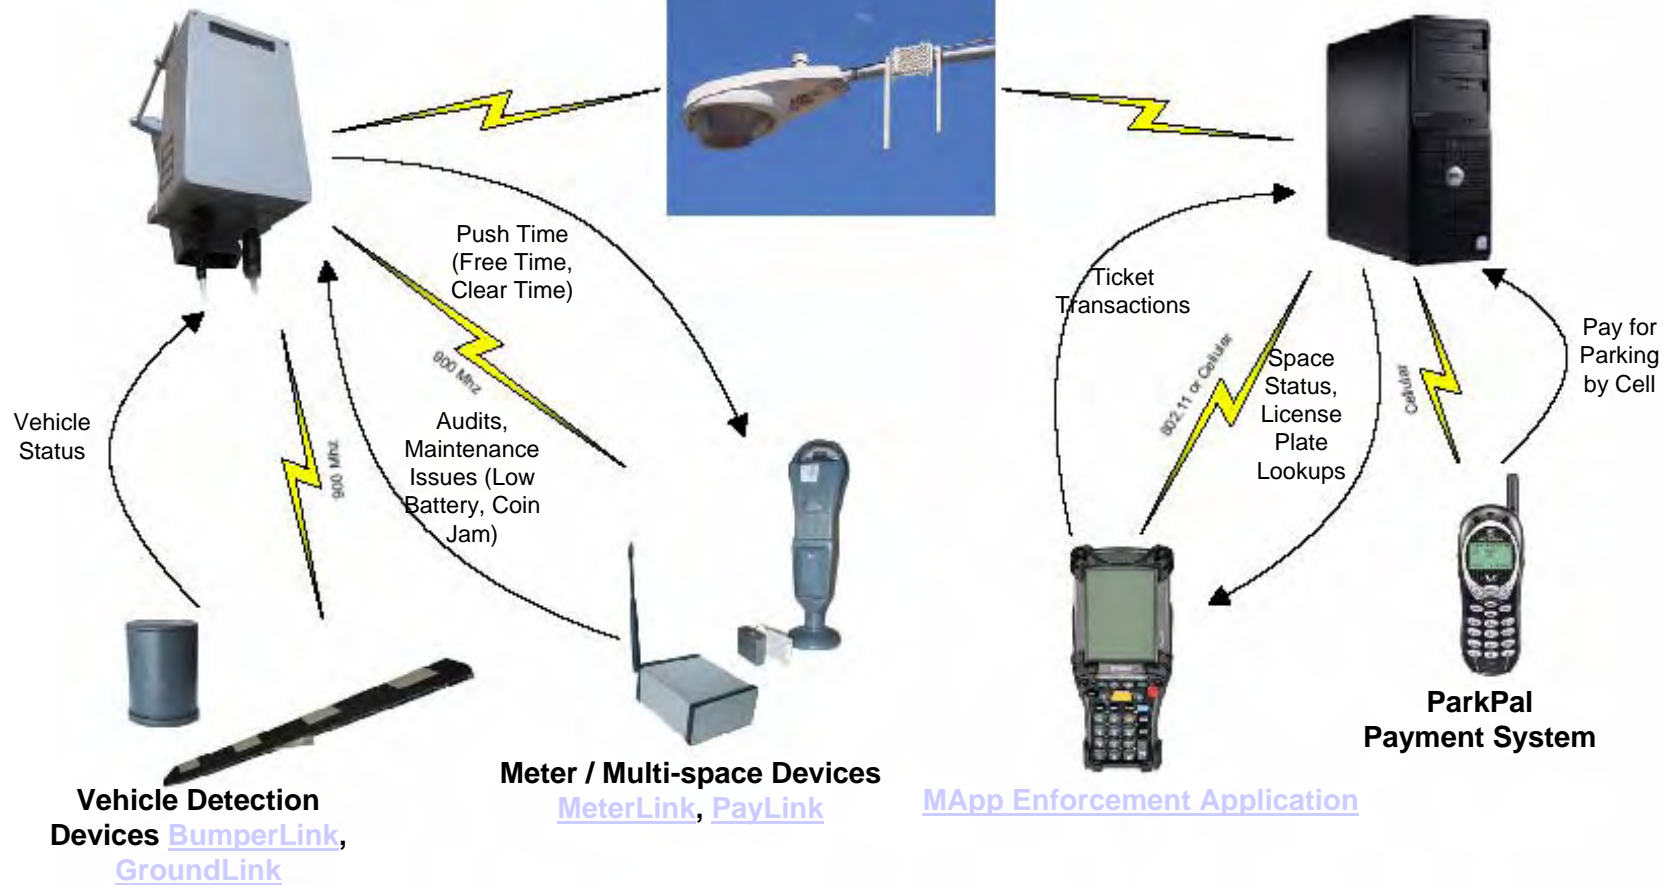

- Creating or enhancing of revenue streams; in a state where adding taxes requires 2/3 vote approval
- Management of resources to help answer the questions of where to install meters or some other type of device, how to efficiently deploy manpower which results in reduced costs of maintenance and enforcement personnel.
- Improves public safety by aiding in enforcement of no parking zones, fire hydrants, etc...
- Provides accurate planning by providing factual parking revenues, equipment functionality, costs and accurate capture rates.

Wireless Network (Backhaul)

SkyLink Wireless Router

IntegratorPro Software
SQL Server Database

Integrated Parking Solutions' wireless data collection and vehicle detection technology gives any parking program a whole new dimension of parking related data. We are connecting all parking space information including occupancy, availability, overtime, and expired conditions, and providing it just in time to where it is needed most

Hardware on street
and in parking lots:

Which Meters are Jammed?

Meters having low batteries?

Meters having dead batteries?

Maintenance Orders By Region & Area

Run Date: October 11, 2007
